

GTC Wealth Accumulator Fund of Funds

Minimum Disclosure Document

31 May 2015

Investment mandate and objective

The equity based portfolio incorporates deep value and core equity investment managers within a multi-manager solution that aims to outperform the FTSE/JSE Shareholders Weighted Index (SWIX) over a three year period. The value bias implies the use of qualitative and quantitative techniques to identify and invest into good quality companies trading at discounted prices. This combination of investment managers integrates risk management strategies to provide consistent returns with reduced volatility during all market conditions.

Investment features:

- Value equity strategy
- Down-weighted resource sector exposure (SWIX benchmark)
- Manager allocations based on risk adjusted investment strategy

Risk Profile of the Fund

High Risk

Cumulative performance since inception (%)

Performance since inception (%)

	1 Year*	2 Year*	3Year*	Since Inception
Wealth Accumulator FoF Class A ¹	5.57	9.77	12.04	11.24
Wealth Accumulator FoF Class B ¹	5.62	9.99	12.34	11.67
Benchmark – FTSE/JSE SWIX ¹	10.85	16.01	19.48	16.78

¹ The stated performance is after fees have been deducted

*Annualised

^lump sum investment performances quoted.

^Income distributions not included in the performance calculation.

^Performance is calculated for the portfolio; individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

Valuation:	Priced a day in arrears	
Fees	Class A	Class B
Annual management fee	1.14%	1.14%
General expenses	1.01%	0.65%

Performance fees

Performance fees are absolute return based, which implies that performance fees are only accrued on positive performances above an adjusted cash benchmark.

Fund Base Fee

Base fees were 2.15% (Class A) and 1.79% (Class B)

Equity performance fees

Absolute based performance fee – 20 % of outperformance of Alexander Forbes MM +3% (Capped at 2%).

Performance fees of 1.67% (Class A) and 1.66% (Class B) were levied on the fund due to outperformance of the benchmark.

Total expense ratio (TER)

A Total Expense Ratio (TER) is a measure of a portfolio's assets that are relinquished as operating expenses. The total operating expenses are expressed as a percentage of the average value of the portfolio. Included in the TER is the proportion of costs that are incurred by the performance component, fee at target, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The total TER* was therefore 3.82% (Class A) and 3.45% (Class B).

TERs shown include VAT

*as at December 2014

Portfolio Commentary

The first quarter of 2015 saw global markets reach record highs before falling off towards the end of March. The MSCI World posted 1.8% (USD) over the quarter, with strong contributions coming from Japan, Europe and the U.S while the UK declined by 0.95%. Quantitative easing in the Eurozone and China initially helped drive up equity prices. Crude oil prices, having experienced dramatic falls in the previous quarter, also stabilised bringing some calm to what had been a highly volatile situation. Market volatility was a key feature of markets over the period as economic news continued to blow hot and cold resulting in risk-on, risk-off being the order of the day.

South African markets rose over the quarter on the back of the global risk on environment with the ALSI posting 5.8% (ZAR) led higher by Financials (13.7%) and Industrials (5.6%) with Resources down 0.25%. Within the fixed income market, the ALBI rose 3.0% with yields coming in on the long end of the curve whilst inflation linked counterparts were also marginally up (0.2%). The Rand declined 5.6% over the quarter.

Disclaimer

This is a minimum disclosure document. GTC Management Company is a member of ASISA. Collective Investment Schemes in Securities are generally medium to long term investments. The value of participatory interests may go down as well as up and the manager does not provide any guarantee either with respect to the capital or the return of a portfolio. CIS's are traded at ruling prices and can engage in borrowing and scrip lending. Different classes of units apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the manager. The manager has a right to close portfolios to new investors in order to manage them more efficiently in accordance with their mandates. Commission and incentives may be paid and if so, would be included in the overall costs. Forward pricing is used. The manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of reinvestment of income. Past performance is not indicative of future performance. Performance is calculated for the portfolio as well as that of the individual investor. Performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The investment performance is for illustrative purposes only. Dealing prices are calculated on a net asset value and auditor's fees, bank charges and trustee fees are levied against the portfolios. GTC does not provide any guarantee either with respect to the capital or the return of a portfolio. Risk profile of the fund ranges from low risk to high risk with a low risk potentially associated with lower rewards and a high risk with potentially higher rewards. Fund of funds are portfolios that invest in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds. GTC does not provide any guarantee either with respect to the capital or the return of a portfolio. Risk profile of the fund ranges from low risk to high risk with a low risk potentially associated with lower rewards and a high risk with potentially higher rewards. GTC's portfolios are valued daily at approximately 15h00. Instructions must reach Silica before 14h00 to ensure same-day valuation. One can also obtain additional information on GTC products on the GTC website and all price related queries or information is readily available on request. GTC is an Authorised Financial Services Provider. FSP731.
