Weighted Total Expense Ratio (WTER)

A Weighted Total Expense Ratio (WTER) is a measure of a portfolio's assets that are relinquished as operating expenses. The weighted total operating expenses are expressed as a percentage of the average value of the portfolio's underlying unit trusts held by the portfolio. Included in the WTER is the proportion of costs that are incurred by the performance component, fee at benchmark, trading costs (including brokerage, VAT, STT, STRATE and insider trading levy) and other expenses. These are disclosed separately as percentages of the net asset value. A higher WTER ratio does not necessarily imply a poor return, nor does a low WTER imply a good return. The current WTER cannot be regarded as an indication of future WTERs.
